Experience

Fullstack Web Developer Intern

Remote

Rowan University

Sep. 2022 - Current

- Communicates closely with owners and clients to develop their ideas into fully responsive web apps using semantic HTML, CSS, Sass, JavaScript, Python, and Django
- Quickly learns new technologies such as Django and Bootstrap and contributes new features and bug fixes to the existing codebase
- Utilizes debugger to walk through existing code and understand codebase before effectively fixing bugs

Freelance Web Designer & Developer

Remote

Freelance

Jan. 2022 - Current

- Works closely with clients to design and develop their ideal vision for their brand, creating mobile responsive websites following user interface and user experience principles
- Actively utilizes Figma, HTML, CSS, Sass, and JavaScript on a daily basis
- Makes use of various tools to determine accessibility, search-engine optimization, and page speed

Fullstack Web Developer Intern

Remote

AH & Association Headquarters

Jan. 2022 - Apr. 2022

- Collaborated within a professional development team to develop full-fledged web apps for various clients
- Assisted in the migration of client websites from Drupal 7 to Drupal 8, allowing for increased website security and performance
- Utilized knowledge of HTML, CSS, and JavaScript to diagnose and fix errors in various client websites

Frontend Developer & IT Technician Intern

Deptford, New Jersey

Pirolli Printing

Jun. 2021 - Nov. 2021

- Collaborated closely with clients and business owner to add and update products on company's website, working with both a CMS as well as HTML, CSS, JavaScript, and jQuery
- Completed technical tickets related to computer issues around the office while researching and advising business owner of best solutions
- Created multiple order forms for new companies that directly lead to increased customers and sales

Projects

Droprr

A React & Python web app that bridges the gap between companies, users, and merchandise

- Lead development and design of presentation layer in React, creating a design system using Atomic Design, Storybook, and Figma
- Designed wireframes and high-fidelity mockups to ease the transition from design to development
- Demonstrated solid understanding of user interface and user experience principles when designing and developing the presentation layer
- Demonstrated expertise in semantic HTML and CSS, following best practices for accessibility and search-engine optimization
- Pulled knowledge from previous fullstack experiences and core understanding of the web to assist team members in overall development, from frontend to backend

Listen Party

A MongoDB, Express, React, & Node.js app that brings people together with music

- Developed both the frontend and the backend logic, allowing for users to create lobbies, join lobbies, and chat to other users
- Utilized TypeScript for its type system, making it easier to transfer uniformed data to and from the backend
- Used Node.js, Express, Mongoose, and MongoDB to develop organized, maintainable, and scalable business logic
- Currently a work in progress, web sockets and user authentication are in active development

Education

Rowan University

Glassboro, New Jersey

Bachelor of Computer Science

Sep. 2018 - May 2023

- A member of the Upsilon Pi Epsilon (UPE) Honor Society with a 3.7 GPA
